PROFESSIONAL SUMMARY

Full Stack Engineer with nearly 3 years of experience building scalable web applications, generative AI integrations, and security platforms used by 90,000+ users. Proficient in TypeScript, React, Node.js, PostgreSQL, and cloud architectures (AWS, Azure, GCP). Track record of leading end-to-end deliverables, CI/CD optimization, and execution time reductions in high-demand environments.

PROFESSIONAL EXPERIENCE

Full Stack Engineer | **Wazuh**

Remote Jan 2026 - Present

- Own platform applications end to end, shortening the path from design to production for new features.
- Build the Wazuh AI Assistant: an LLM-powered backend that turns manual security-platform searches into guided, actionable answers, with RBAC-aware responses and privacy controls on data sent to AI providers.
- Deliver features across Case management, Security Analytics, Threat Hunting, Vulnerability Detection, and agent management for a platform with 90,000+ users.
- Harden the dashboard with encrypted AI provider API keys and fixes for log and CSV injection.
- Improve performance and packaging by minifying production bundles and reducing package dependencies.
- Own CI/CD pipelines with GitHub Actions, cutting manual release effort and enabling faster, safer deployments.
- Merged 180+ pull requests across Wazuh dashboard repositories.

Back End Developer | **Tres Pi Medios / Stanley Black & Decker**

Remote Jul 2024 - Jan 2026

- Developed and deployed a tool loan and repair management platform for Stanley Black & Decker (Italy), cutting task execution time by 50%.
- Implemented an Azure Cloud Function with generative AI integration to automate Zendesk responses for Stanley Black & Decker (U.S.) customers.
- Built conversation routing software on Smooch (now Zendesk Conversations), centralizing channel data so agents get full context on every conversation.
- Developed chatbot features for customer support workflows in the U.S. and Canada.
- Implemented real-time data delivery to Power BI dashboards, enhancing visibility and operational reporting.
- Delivered full-stack internationalization (i18n) across frontend and backend for Italy and Middle East markets (Italian/English).
- Migrated customer support backend to serverless architecture, decommissioning four legacy services and optimizing resource usage.

Full Stack Developer - Trainee | **SuperGIROS**

Cucuta, CO Jan 2024 - Jul 2024

- Developed a Node.js chatbot to assist sales staff across 1,100+ branches, reducing helpdesk calls by 60%.
- Improved main web application performance by 40% through code refactoring, query optimization, and Angular upgrade.
- Built an inventory and procurement management application from scratch, reducing task turnaround time by 50%.
- Engineered RESTful APIs using Java, Spring, Hibernate, and remote Oracle SQL databases.
- Deployed RESTful microservices in a containerized Docker and Linux server environment.
- Developed a Java desktop service for dot-matrix printer management with real-time updates via WebSocket.

TECHNICAL SKILLS

Back End: Node.js, Express.js, Spring Boot, Spring, Java

Front End: React.js, Next.js, Angular, Redux, Tailwind CSS, Sass, Material-UI, HTML, CSS

Languages: TypeScript, JavaScript, Java, Bash

Databases: PostgreSQL, MongoDB, MySQL, Elasticsearch, OpenSearch, Oracle SQL

ORMs: Sequelize, Hibernate

Cloud: AWS, Azure, GCP

DevOps & Tools: Docker, Linux, GitHub Actions, CI/CD, Git, GitHub, GitLab, NPM, Yarn, Vite, Maven

Testing: Jest, Vitest, Testing Library

Other: REST APIs, Clean Architecture, Generative AI, LLM Integrations, RBAC, Power BI, Jira, Astro, Framer Motion

EDUCATION

2025 - Present B.S. in Systems Engineering

Universidad Nacional Abierta y a Distancia

2022 - 2024 Associate Degree in Software Analysis and Development

Servicio Nacional de Aprendizaje (SENA)

LANGUAGES

English: Professional Working Proficiency (B2+)

Spanish: Native
